Subject: RE: Gold King H&S Plan

Hi All

It is likely that they have a health and safety plan in place at the ICP in Farmington already. They discuss it in their IAP

Bret has a USCG member as a safety officer in the IC.

I advise we do not duplicate their effort. But it would be great to get a copy of the plan and include it in the deployment package if that has not already happened.

Alternatively and, better yet, it should be included as part of their check in process at the ICP in Durango so that the H&S officer can advise from the ICP and we do not duplicate their effort in that respect. We can liaison with their resources folks to see what they want us to do to prep folks.

Durango may have a different H&S plan.

Please let me know if I am missing an element of the EPA specific ICS deployment protocol and we can adjust our approach.

As we discussed at the AC meeting, we will benefit from getting a revised/final deployment guide that covers all of these issues and includes input from FINANCE and Farmington. I expect that may be what you are working on Tana. Given that we are functioning as an EOC support AC and not a field/operational ICP or AC it seems that some of our products may be slightly different than the norm.

With a crew of RSC folks arriving today and a LOGs person following shortly, we should have sufficient staff to help with the catch up work load.

thanks

Kathryn Lawrence

Subject: Gold King H&S Plan

Hi Jeff, do you have a health and safety plan for deployed staff going to Gold King?
